On the Trail of Knowledge

40 Spectacular Stories from Science & Research

Accompanied by witty and charming explanations, the readers go on exciting research trips in this non-fiction book. They sail across the sea in a raft and take part in excavations. They enter the "mini-world" of the smallest particles and the big question about the origin of the universe. On some pages, real criminal cases and their relation to science are explained - like the theft of the Mona Lisa, the most famous painting in the world. In another case, the "culprits" are tiny bacteria and the question is how to render them harmless. Whether there are extraterrestrials and what the strange signals from outer space are all about will of course also be clarified. In addition to many exciting stories about research and invention, each chapter contains a research assignment: check fingerprints, conduct amazing experiments, decipher secret messages and solve tricky riddles. Who will build the longest paper bridge in the world? An amazing book for young researchers from 8 years.

Title Information

Author: Dr. Volker Kratzenberg-Annies
Category: Knowledge
Age range: 8+ years
Artwork: With numerous photographs and illustrations
Format: HC, 144 pp, 23 x 27,8 cm

Key Selling Points
