Content:

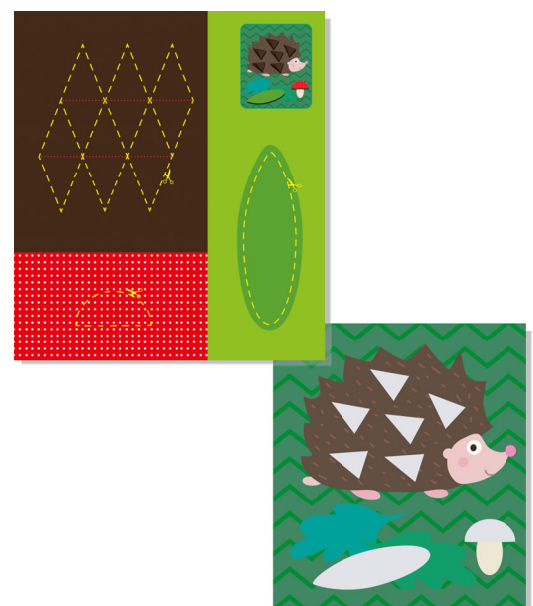

Cut out, fold, glue on – and quickly an own work of art with 3D effect is ready! The simple shapes and generous cut-out elements on high-quality paper are easy to handle for small children. A handicraft instruction for each motif with a picture of the finished work reveals how they can best fold, roll or crease the paper. With a little dexterity, the elephant's ears stick out, the lion has a wild mane and the turtle's body curves into a hemisphere. When everything is done, the funny works of art decorate the children's room or bring a smile to the face of a favourite person. Great crafting fun for the youngest!
