Quick Quick - Ready!

Dinosaurs

Great crafting fun for the little ones! With the craft booklet, children from 3 years can bring their own little dinosaur park into the children's room. More than scissors and glue is not needed. The templates can be easily detached and cut out by children. Simple shapes such as circles or squares on generous cut elements form the basis for the pretty figures with 3D effect. The high-quality paper is easy to handle for children's hands: Cut out, fold, glue on - and the eight dinosaurs are ready. And quite incidentally, concentration and motor skills are improved.
