

Stinkers, Suckers, Slimers

22 Fascinating Creepy Animals

8+ years

Stinkers, Suckers, Slimers

Dogs, cats, squirrels and bees are cute and every child likes them. But there are also many animals that don't win any beauty contests and struggle through life without the cuddle factor: they are slimy, creepy, scary or simply disgusting. However, these animals do incredible things for their survival, and ours. Vultures protect us from nasty pathogens. A small crab produces a loud bang when threatened, which even alarms submarine captains and causes glass to break, and the hirudin produced by slimy leeches inhibits inflammation and relieves pain. Reason enough to give these and other heroic animals a stage and honour their outstanding talents and characteristics. Plus: specials such as "The deadliest animals in the world". An exciting non-fiction book for children aged 8 and up with amazing statistics and unique graphics that will stay in your head and make you think.

Title Information

Author: Katja Trippel
Illustrator: Ole Häntzschel
Category: Knowledge
Age range: 8+ years
Artwork: Full-colour illustrations and photos
Format: HC, 96 pp, 23 x 27.8 cm
