

WAS IST WAS Junior Vol. 44 Robots!

Robots that can vacuum the children's room, mop the bathroom, mow the lawn or even steer lorries through traffic? They already exist and new robots with impressive capabilities are constantly being developed. They help care for sick or elderly people, save lives in the fire brigade or assemble cars on an assembly line. You can even have real conversations with some of them with the help of Chat GPT. This non-fiction book gives children an insight into the fascinating world of robots and what the future holds for these technical helpers. An exciting non-fiction book with funny flaps and lively illustrations for technology fans aged 5 and up.

WAS IST WAS Junior Book Series

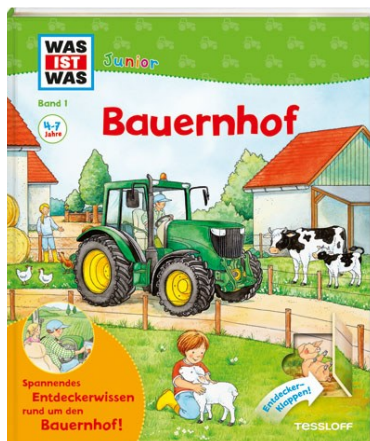

Large, detailed illustrations and exciting key questions engage children in their favourite topics. With shaped discovery flaps and amazing facts, the WAS IST WAS Junior Series makes kids curious and opens up a new and exciting world.
