

Entertaining insider information

Lively texts make kids curious

## Vol. 147 The Toilet

### Everything you need to know

We all appreciate it when it's close by for urgent needs: the toilet. A place of silence and sometimes also of creativity. Today's (high-tech) toilets have a long history. Prehistoric animals used to go to a special place together to do their business, and even in ancient times, going to the toilet was a social event. A look beyond the toilet seat shows today's sophisticated sewage system and presents toilets in different cultures and at different times. Who invented toilet paper and what is a toilet seat made of? Exciting, informative and with many impressive photos, the book takes you through the history of the toilet.

WAS IST WAS the famous fact book series for children from the age of 8 and up presents knowledge in brief, informative texts and with first-class photographs. Excellent info-graphics explain complex issues and funny extras deepen the knowledge.

### Title Information

Category: WAS IST WAS Book series  
 Age range: 8+ years  
 Artwork: Numerous photos, illustrations and info graphics  
 Format: HC, 48 pp, 23 x 28 cm

### Key Selling Points

- More than 100 Millions copies sold worldwide
- Big variety of popular and relevant topics
- Developed and written by fact book experts
