

Dinosaurs - Super Lizards of Prehistoric Times

Dinos are extinct? Not at all! They are everywhere. But where? With cool facts and pictures, the children immerse themselves in the life of the super lizards. What did life on earth look like over 60 million years ago? What habitats did they have? How did the dinos evolve into herbivores and carnivores? What do dinos have to do with the domestic chicken? The two reveal all in an exclusive interview. Would it be possible to resurrect dinosaurs today? Readers go in search of clues from the past to explore the lives of these gigantic lizards. An entertaining and impressive book about children's favourite animals.

The new WAS IST WAS

We are continuing to write the brand history of WAS IST WAS. Our vision: We want to get every child excited about knowledge. Factual knowledge at the highest level, simply explained and always at eye level - that is and remains our brand promise. We want to reach children in their curiosity and accompany them from knowledge to ability. So that they are able to become strong personalities who develop their own attitude.
