

Ingeniously Clever!

Brilliant Minds ... and Their Ideas

Who do we have to thank for the discovery of DNA, the use of solar energy and the development of the Internet? And who invented helpful everyday objects such as refrigerators, glasses and soccer shoes with cleats? On 192 pages this WAS IST WAS Edition introduces ingenious personalities from the world of chemistry, biology, physics, music, medicine and culture. It goes from A for Mary Anning to Z for Konrad Zuse - women and men whose discoveries changed the world. You can find young scientists presented next to familiar names, introducing the children to the worlds of brilliant minds and their ideas!

Learn more about the women and men who have changed our everyday lives and sometimes even the world with their ideas!
